Wax services are performed with utmost attention to sanitation using low temperature cream and hard waxes that are both highly effective and gentle to your skin. If you are currently using prescription retinols or have taken Accutane during the last 6 months, or have had recent cosmetic laser treatments, microdermabrasion, chemical peels or have a current cold sore, facial waxing may not be an option for you at this time. I will be happy to discuss waxing time-frames or you may check with your physician to determine when you can safely receive these services. If you have any questions, please contact me:

Specialty Facials and Treatments:

RASPBERRIES AND CHAMPAGNE: Raspberry enzymes and an effervescent oxygenating mask decongests and refreshes the most delicate complexions. This breath of fresh air will make you Red Carpet ready! \$85

A LIFT Rx OR C LIFT Rx: These treatments use slow-release technology to deliver high potency ingredients to diminish superficial wrinkles, even skin tone, smooth texture and restore glow. These treatments include a Celluma LED treatment. C-Lift Rx, \$85 A-Lift, Rx \$90. C and A Lift Rx offers the option of extending the treatment with a month of weekly home treatments.

MULTI-LAYER VITAMIN C: This treatment layers 5 different applications of Vitamin C (the great 'lightener, brightener, tightener') to exfoliate and illuminate your skin. Clients' favorite! This is the perfect 'get the glow' treatment needed before any special occasion.

MOISTURE INFUSION: Gentle exfoliating enzymes, an ultrasonically penetrated advanced hydration mask plus a serum massage provide soothing moisture, helps reverse TEWL (trans-epidermal water loss), and repairs environmental damage from travel, sports, heat, cold, and wind.

Microdermabrasion: Microdermabrasion is a treatment that uses ultra-fine crystals to gently and remove the build-up of excessive dead skin cells and debris from the surface of the skin. A single treatment immediately improves the texture of skin and increases the penetration of all other products. A series of 4-8 treatments reduces the appearance of superficial wrinkles, uneven pigment and superficial scarring, resulting in smoother skin with fewer visible signs of aging. You can wear make-up or return to work immediately following your visit.

as a set, your customized series of peel, microdermabrasion or combination treatments always receive discounts. Treatment series require consultation during which goals, options and costs will be discussed.

Peels: Peels are treatments that use chemical solutions to break down and remove dead skin cells and debris from the surface of the skin. Peels can reduce the visible signs of aging (superficial wrinkles, uneven pigment), smooth and brighten skin and help improve acne. A single peel can improve the texture and luminosity of skin but to achieve specific goals, a series of 4-8 peels is recommended.

Treatment Series Packages: When purchased as a set, your customized series of peel, microdermabrasion or combination treatments always receive discounts. Treatment series require consultation during which goals, options and costs will be discussed.

Acne Treatments

Clearing acne needs more than celebrity products. It takes a dedicated professional providing hands-on acne treatments and a monitored *custom* regimen of proven effective products. Dermatologists don't have the time to provide the treatment and guidance required to stay ahead of your acne.

That's my job!

I am certified in the Face Reality method for successful prescription-free treatment of adolescent and adult acne and am ready to help you transform your skin. Please call to schedule a consultation or visit www.strategicskincare.com

Now is the time to take control of your acne...

Now is the time to see improvement week after week after week...

Now is the time to be happy with your skin!
